Java Script
Unstop, Virtual

TECHNICAL SKILLS

- HTML
- CSS
- Java Script
- Tailwind CSS
- React.js
- Node.js
- Frontend Development
- Java Programming
- Python(Basic)
- Database
- OOPs
- AI Tools

SOFT SKILLS

- English Communication
- Team Coordination
- Time Management

PROJECTS

SpotifyClone

- Developed a responsive Spotify-inspired music player using HTML5, CSS3, and JavaScript.
- Implemented **HTML5 Audio API** features including Play/Pause, Next/Previous, Seekbar, Volume, Mute, and Auto-Play.
- Built dynamic playlists, real-time search, and song loading using **Fetch API** and **JSON metadata**.
- Added responsive navigation, playlist covers, and dynamic song library for an interactive user experience.

Employee Management System

- Developed an Employee Management System using React.js, Tailwind CSS, and Local Storage.
- Implemented Login, Admin Dashboard, and Employee Dashboard with role-based access and task management.
- Enabled admins to create and assign tasks, with assigned tasks dynamically displayed on the employee dashboard.

Github Link : [https://github.com/BuildWithRaza/Employee_Management_System]

Eventora - Full-Stack Event Booking Platform

- Developed Eventora, a full-stack event booking platform using **MongoDB**, **Express.js, React.js, Node.js (MERN),** and **Tailwind CSS.**
- Implemented JWT authentication, bcrypt password hashing, email OTP verification, and role-based access control for secure user and admin operations.
- Built event management, ticket booking, payment status tracking, and admin analytics, integrating Nodemailer for automated email notifications and seat availability validation.

Github Link : [https://github.com/BuildWithRaza/EventBookingWebApp]

Stock Management System

- Developed a desktop-based Stock Management System using Java, Java Swing, and JDBC to manage inventory and product records.
- Implemented CRUD operations, database connectivity, stock tracking, and user-friendly GUI for efficient inventory management.
